## RESERVE ATHLETIC ASSOCIATION

The Reserve Athletic Association has been a Spring through Fall staple in the community for decades. Our programs include boys' baseball from 4-year-old at the t-ball level to 12 and under baseball teams. Also, we provide softball programs for ages 4 through 16. In the summer of 2024, the boys have had success as runner ups for their league as well as the 12u baseball team winning a championship at home. The girls had similar success with a runner up trophy for their home tournament in June as well as two tournament championships for the 10 and under girls' softball team. We host games from April through October each year for baseball and softball programs. We have many wonderful

volunteers and so much support from this community that fill the field with cheers and smiles while feasting on food from our concession stand. You can find us on Facebook or visit our website at [www.reserveaa.com](http://www.reserveaa.com) to reach out for any further information.

### MS4 Information -

(Municipal Separate Storm Sewer System)

Raking leaves onto a stormwater inlet creates more pollution of local streams and waterways. Not only do leaves contribute to stream pollution, but they can also cause localized flooding if they clog storm drains and pipes. Help protect nearby waterways from excess nutrients and never rake leaves into storm drains  
• **Plant trees.** Fall is a perfect time for planting trees and shrubs. Be sure to plant species native to PA.

• **Prune your trees, shrubs, and perennials.** Fall is the best time to prune trees and other plants in your yard. Pruning allows them to jump-start their growth and utilize more stormwater.

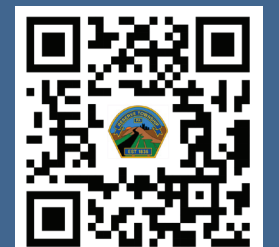

• **Clear leaves and debris from gutters.** After cleaning your gutters, install a rain barrel at the end of your downspout to reduce the amount of stormwater running from your property.  
• **Scoop the poop!** Be sure to pick up after your dog. Their waste is not natural - it is full of bacteria and excess nutrients that will create algae blooms and contaminate local waterways.
