Official Message from the Township Manager:

A major water break has been identified on Mount Troy Road that will require emergency repairs on Thursday, February 13th. The water service will be shut off starting around 9:00am so that Public Works can assess and repair the break and install a new valve.

This will affect the southern end of the Township, including all neighborhoods off Mount Troy Road starting at 3605 south to the Township border. This will also affect Otto, Walters, Johnston, and Stanton Avenue Ext.

Reserve Township places the wellbeing of its residents first and foremost, and with that we would like to acknowledge ongoing issues with the Township's water system that have resulted in frequent service interruptions.

The Township's water system is old, and many years of inadequate maintenance have compounded to create the current issues with the system. We wish to provide a higher level of service to our residents, which is why it is sometimes necessary to interrupt service to make repairs and perform preventative maintenance to prevent more serious future issues. We acknowledge the inconvenience that is caused by the required maintenance of this aging water system as we strive to improve water services.

Our vision is to maintain and improve water infrastructure for a better utility service and we believe we have the proper team in place to accomplish this.

In the meantime, please rest assured that keeping our residents safe and informed is our top priority.

Thank you for being valued members of the Reserve Township community.
